

Connecting Our Future Mobility Alliance

Upstate Mobility Alliance – Pledge of Engagement

The Connecting Our Future Upstate Mobility Vision calls for the Upstate to be “a vibrant and connected region, where transportation policy and investments promote innovation, sustainable development, and economic prosperity for all residents and businesses”

In recognition of the importance of working across boundaries and sectors to collectively improve access to transportation and the movement of people and goods across the Upstate, the Upstate Mobility Alliance has been created to support the implementation of the Connecting Our Future regional mobility vision and actionable strategies.

By agreeing to participate as an Upstate Mobility Alliance member, our organization commits to being engaged in local and regional efforts that support the over-arching regional mobility vision. This is a non-binding pledge, which means that this commitment of engagement does not specifically obligate our entity to provide funding, policies or manpower to directly implement strategies developed through the Alliance, though we may make such a commitment at a later time.

As an Alliance member, we will identify the strategies and actions that our organization can be involved in helping move forward. We commit to participating in the Alliance task forces and will support efforts by the Alliance to grow collaboration around mobility and transportation issues across the Upstate.
